

ADAM JURDI

Tustin, CA • (714) 862-3841 • adamjurdi@yahoo.com • jurdi.pro

Recent Cal State Fullerton finance graduate focused on technology investing across public and private markets. I run a research portfolio at jurdi.pro spanning equity theses, venture-stage analysis of private companies, and technical deep dives on the semiconductor and AI-infrastructure sectors. FINRA SIE certified, pursuing roles in equity research, venture capital, and investment banking with a technology focus.

SKILLS & CREDENTIALS

Financial Modeling: Three-statement models, DCF valuation, trading comps, sum-of-the-parts, scenario and sensitivity analysis.

Sector Expertise: Semiconductors, custom ASICs, advanced packaging and yield economics, AI infrastructure, optical/photonics.

Technical: Excel modeling and dashboards, econometric regression.

Exams & Licenses: Passed FINRA Securities Industry Essentials (SIE); CA Life, Accident & Health licenses.

INDEPENDENT RESEARCH & PORTFOLIO — jurdi.pro

Self-directed equity and venture analysis across the technology sector.

- **Equity research:** Published full theses on Marvell (MRVL), Super Micro (SMCI), Nokia (NOK), and Rocket Lab (RKLB), each built on three-statement modeling, DCF, and comparable-company analysis.
- **Venture analysis:** Published a venture-stage deep dive on Neurophos, a private photonics startup, evaluating its technology, team, investor syndicate, and the manufacturing risk that has historically killed optical-computing companies, concluding with an honest investment judgment.
- **Interactive tooling:** Built a semiconductor yield and chiplet-economics calculator with a live wafer-map visualization, demonstrating the manufacturing economics underlying chip-company margins.
- **Technical deep dives:** Published write-ups on custom silicon economics and optical computing, translating frontier technology into investment-relevant analysis.
- **Macroeconomic research:** Log-linear regression models isolating structural drivers of the U.S. trade deficit (final specification $R^2 = 96.4\%$).

EXPERIENCE

Data Management & Financial Analysis Lead | Evolve Capital Finance, San Clemente, CA 2024 – 2025

- Built Excel models to automate financial data processing, reducing errors and speeding reporting turnaround; supported monthly reporting and ran variance analysis on vendor workflows.
- Reconciled financial documents across the CRM database, improving data accuracy and budget-vs-actual monitoring; tracked project spend and flagged variances at the cost-center level.

Data & Operations Analyst | Absolute Law Group, Tustin, CA 2024 – 2025

- Analyzed large structured data sets to score and rank high-value acquisition targets using quantitative criteria; delivered reports and financial summaries to leadership to support prioritization decisions.
- Developed and maintained scalable data-management processes, identifying workflow improvements and implementing database optimizations as the organization grew.

Assistant Manager | Quiksilver, Irvine / Laguna Beach, CA 2021 – 2024

- Led a team of 12 that consistently hit revenue targets through data-informed process improvements, inventory tracking, and training modules adopted across multiple locations.
- Handled daily bank deposits, cash reconciliation, and transaction reporting; restructured inventory and shipment processes to get new product to the floor faster.

EDUCATION

B.A., Business Administration, Finance & Economics Concentration | CSU Fullerton December 2025

A.A. Degrees: Economics, Business Administration, Liberal Arts | Santiago Canyon College December 2023
